### **February 1, 2006 MEETING CANCELLED**

#### **2004/05 Countywide Transportation Model Update Task Force Meeting Update**

##### **1. Land Use Allocation and Review**

All of the jurisdictions are currently reviewing the reallocated land use data that was sent to them in late December. Electronic copies of the data are available on the ACCMA website. The project team is addressing questions from the jurisdictions regarding land use data review. Questions on employment classification and request for additional information such as TAZ shape files and correspondence tables have been received from some of the jurisdictions. ACCMA staff will be following up with the jurisdictions on the progress of the review. The jurisdictions have until March 3, 2006 to submit comments.

##### **2. Travel Demand Models Update**

The consultant team continues to update the travel demand model processes for application to Cube/Voyager software and for refinement of the regional models to provide more detail in Alameda County. Work is also in progress on the calibration of the model by compiling survey data and creating calibration targets. Since the last meeting, Transit survey data from AC Transit has been received and the consultant team is expanding the available surveys to create the calibration targets for mode choice. Due to certain restrictions in disclosing the survey data, BART has asked the CMA to send a letter describing the purpose of the data request and details of the data that will be used for the project. This request will be sent to BART soon. An update on work accomplished since the last meeting will be provided at the next meeting.

##### **3. Model Validation Update**

The consultant team continues work on the validation of the model by compiling year 2000 traffic counts. The CMA staff is in the process of identifying the locations/jurisdictions for which 2000 traffic counts are missing. A separate letter requesting the available year 2000 counts will be sent to relevant jurisdictions by end of February 1<sup>st</sup> week.

##### **4. Next Meeting**

The next meeting is scheduled for Wednesday, March 1, 2006 at 9:00 a.m.
